

THE LOCAL AI GOLDMINE BLUEPRINT

Building a \$5k/Month Agency with Simple Automation

The Multi-Billion Dollar 'Missed Call' Problem

Your local plumber, roofer, and landscaper are losing thousands of dollars every month. Why? Because they're busy working. When a new customer calls, they don't answer. The customer hangs up and calls the next guy on Google.

You are going to fix this. You're not selling 'marketing.' You're selling booked appointments.

The \$0-Upfront Stack

1. **GoHighLevel:** The all-in-one engine for local business automation.
2. **Vapi or Bland.ai:** Simple AI voice agents that sound human and book calendars.
3. **Google Maps:** Your lead generation source. Look for businesses with 4+ stars but 'slow' reply times.

The 48-Hour Execution Plan

Hour 1-4: Research 20 local service businesses. Check their 'Message' button on Google. If it's disabled or they don't reply in 10 mins, they are your target.

Hour 5-10: Set up a demo AI agent that says: 'Hi, I'm the AI assistant for [Business Name]. I see we missed your call. Would you like to book a time for a quote?'

Hour 11-24: Outreach. Send a video of the demo working to the owner. *'Hey [Name], I built this for you. It turns your missed calls into booked jobs. Want to try it for free for 7 days?'*

The Math

Setup Fee: \$499.

Monthly Retainer: \$199 (includes tech support and optimization).

5 Clients = \$3,500 Setup + \$1,000/mo Recurring.

Authenticity is your moat. Freedom is your reward. Get to work.
